## WORK EXPERIENCE

[ 01/14/2022 – 11/30/2023 ]

### Software Engineer - QA

**Nuvento Systems Pvt. Ltd.**

**City**: Kerala | **Country**: India

**Project Title: Silicon Valley Bank – GRC (Apr 2023 – Nov 2023)**

**Tools and Technology**: ATF, JIRA, ServiceNow

Roles & Responsibilities:

- Wrote and executed test cases for Issue Management and Intake Form creation.
- Performed end-to-end testing to ensure comprehensive application coverage.
- Automated test cases using the ATF framework to increase testing efficiency.
- Impersonated multiple users to verify tasks and send them for approval in the QA environment.
- Contributed to improving the overall quality and reliability of the application.
- Ensured timely and efficient identification of defects through automated and end-to-end testing.
- Enhanced team productivity and the project's success with effective testing strategies.

**Project Title: H&R Block (Jan 2023 – Apr 2023)**

**Tools and Technology**: C#, Selenium, Azure DevOps, Data Driven, Visual Studio

Software Engineer-QA at Nuvento (HRB Project)

Roles & Responsibilities:

- Crafted thorough test cases, scenarios, and test data to align with business requirements.
- Conducted rigorous system, smoke, and regression testing to ensure application robustness and reliability.
- Identified and reported bugs promptly, contributing to improved software quality.

- Implemented UI Automation with Selenium (C#) and CTF, significantly boosting testing efficiency.
- Maintained a detailed defect log using Azure DevOps, facilitating transparent issue tracking.
- Provided valuable insights into test script enhancements, optimizing testing processes.
- Communicated effectively with off-shore clients in the USA to troubleshoot issues and ensure project success.
- Suggested ideas to the Development team, resulting in a 10% improvement in procedures.
- Enhanced project efficiency, improved software quality, and contributed significantly to the successful delivery of the HRB project goals at Nuvento.

[ 09/09/2019 – 12/24/2021 ]

## **Software Test Engineer**

### ***Tata Consultancy Services***

**City:** Chennai ,Tamil Nadu | **Country:** India

**Project Title:** Xfinity (Sep 2019 – Dec 2021)

### **Tools and Technology: Java, Selenium, TestNG, JIRA, Cucumber, Eclipse**

#### Roles & Responsibilities:

- Achieved clear understanding of project objectives and scope by comprehending requirement documents, ensuring accurate implementation and alignment with business goals.
- Crafted detailed test scenarios and test cases based on specified requirements, ensuring comprehensive coverage and adherence to project goals.
- Executed test cases manually and automated using Selenium with Java and TestNG, validating application functionality and performance.
- Implemented the Cucumber BDD Framework to promote collaborative development and testing practices, enhancing team efficiency.
- Conducted Functional & Regression Testing, including System Testing, Smoke Testing, and Sanity Testing, ensuring application robustness.
- Reviewed and modified test scripts in JIRA to identify and report defects, maintaining a detailed defect log for effective issue resolution.
- Compiled daily status reports to provide stakeholders with project progress visibility, facilitating informed decision-making.
- These efforts significantly enhanced project efficiency, improved software quality, and ensured the successful delivery of the Xfinity project at TCS.
